
THREE YEARS OF EVOLUTION

FOR TROMBONE, ELECTRONICS AND 8-BAR LED SYSTEM

ADRIÁN VELASCO 2024

Three Years of Evolution

Notas al programa

"Three Years of Evolution" muestra la relación íntima y dinámica que se establece entre un individuo, representado por el trombonista, y la exigente ciudad que lo acogerá durante los próximos tres años. La pieza explora cómo las nuevas generaciones afrontan la independencia y las dependencias que surgen precisamente de ciertas partes del proceso.

Ocho barras LED, dispuestas en dos filas de cuatro, crean el espacio de interacción, donde ambas entidades entablan un diálogo sobre su necesidad mutua y cómo esta necesidad evoluciona con el tiempo.

A lo largo de los años, el intérprete atraviesa diversos estados emocionales, que van desde la inmersión total en las exigencias de la gran ciudad hasta el rechazo absoluto de sus dinámicas.

Esta tensión impulsa el desarrollo de la obra dentro del espacio escenográfico, ya sea rompiendo el corredor impuesto por la ciudad, atravesándolo por completo o apropiándoselo con comodidad.

La independencia, lejos de ser un estado absoluto, se convierte en un proceso continuo de negociación con las estructuras existentes. El trombonista no solo lucha con o contra la ciudad, sino que también aprende de ella, descubriendo en sus desafíos oportunidades de crecimiento y autoconocimiento.

En última instancia, Three Years of Evolution presenta una experiencia personal, en la que el individuo madura a través del aprendizaje que surge de la interacción con las expectativas.

Program Notes

"Three Years of Evolution" showcases the intimate and dynamic relationship established between an individual, represented by the trombonist, and the demanding city that will host him for the next three years.

The piece explores how new generations approach independence and the dependencies that emerge precisely from certain parts of the process.

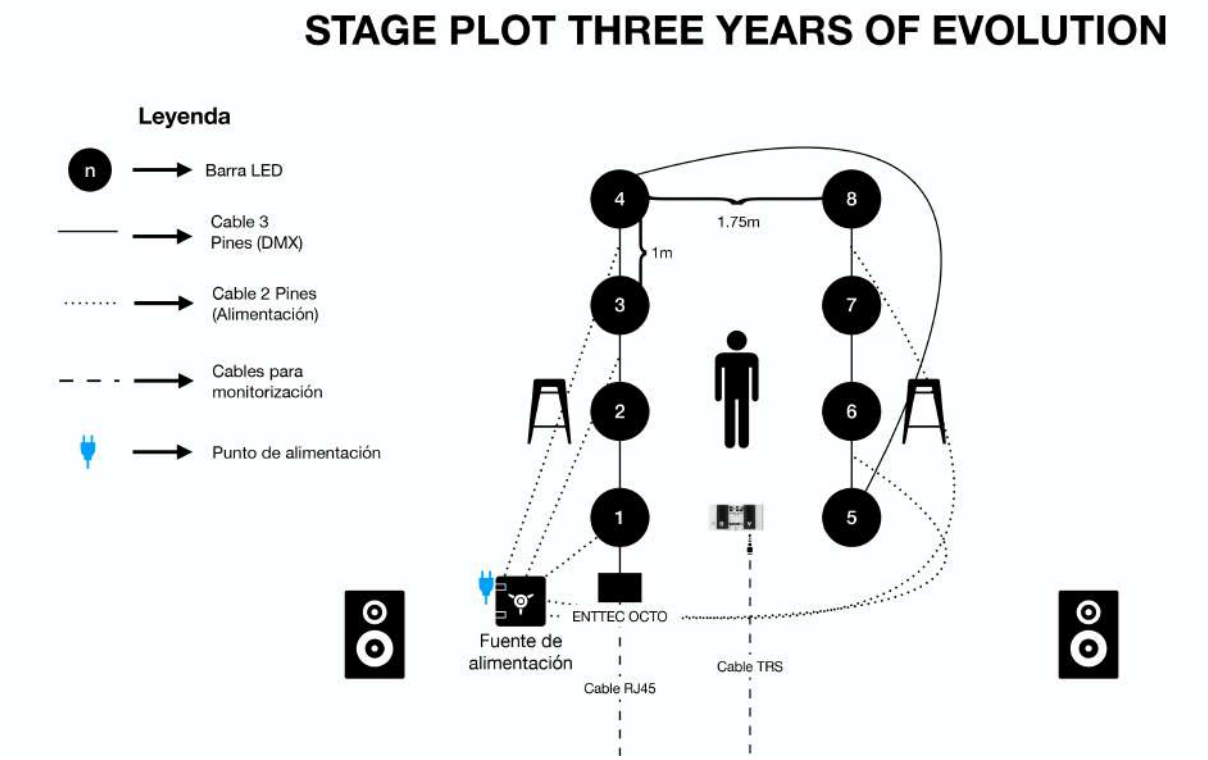
Eight LED bars, positioned in two rows of four, create the space of interaction, where both entities engage in a dialogue about their need for one another and how this need evolves over time.

Throughout the years, the performer experiences various emotional states, ranging from total immersion in the demands of the big city to complete rejection of its dynamics.

This tension drives the work to flow within the scenographic space—whether by breaking the corridor imposed by the city, fully traversing it, or comfortably claiming it as his own.

Independence, far from being an absolute state, becomes a continuous process of negotiation with existing structures. The trombonist does not merely struggle with or against the city but also learns from it, discovering in its challenges opportunities for growth and self-awareness.

Ultimately, Three Years of Evolution presents a personal experience, where the individual matures through the learning that arises from interaction with expectations.



Requisitos técnicos:

- Micrófono inalámbrico para el trombón.
- Sistema de monitoreo In-Ear.
- Pedal para lanzamiento de señales (cue triggering).

Software utilizado:

- Ableton Live
- TouchDesigner
- QLab

Leyenda

Las barras LED estarán dispuestas en dos filas de cuatro, formando un pasillo con suficiente espacio para que el intérprete se desplace con relativa facilidad entre ellas. La partitura incluirá indicaciones de movimiento, representadas mediante puntos para cada una de las barras, una cruz para el intérprete y, si es necesario, una flecha que indique la dirección del desplazamiento.

Ej: 
Las indicaciones de “Electronics” y de “Lights” son referencias generales, pero el intérprete casi siempre tendrá al metrónomo como la guía principal.

{FIG.1} = En la última página de este pdf están todas las figuras que sirven como previsualizaciones de lo que va sucediendo en las ocho barras LED
